Figure 1: Share of job postings offering remote or hybrid work 

Notes: This figure shows the percent of vacancy postings that say the job allows one or more remote workdays per week. We compute these monthly, country–level shares as the weighted mean of the own–country occupation–level shares, with weights given by the U.S. vacancy distribution in 2019. Our occupation–level granularity is roughly equivalent to six–digit SOC codes. Figures depicts the 3–month moving average
